THE BETTER WATER YOUR HOME DESERVES.

The entire Evolve Series® water treatment product line is built with pride in the USA. Evolve is a trusted name in the water treatment industry and is dedicated to advancing the science and art of innovative solutions that help create brilliant water for your home.

As an Evolve dealer, we are part of a select group of certified dealers who exclusively sell and service Evolve Series systems. Give us a call and see how we can deliver the highest quality water for you and your family.

YOUR LOCAL, AUTHORIZED EVOLVE DEALER:

BETTER SCIENCE. BRILLIANT WATER.®

THE ART AND SCIENCE OF QUALITY WATER.

Water. In its cleanest form, it's as simple as two parts hydrogen, one part oxygen. Unfortunately, getting it this clean, this brilliant is not so simple.

There's a lot of science and a little artistry needed to provide your household with the quality water you deserve. Fortunately, Evolve Series® conditioners, softeners, filters and reverse osmosis drinking water systems are designed to do just that.

BETTER SCIENCE. BRILLIANT WATER.®

EVOLVE® CONDITIONERS:

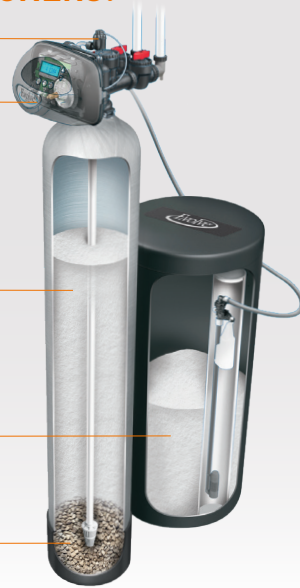

PATENTED, INTEGRATED CHLORINE GENERATOR

PATENTED IQ² TECHNOLOGY

EXCLUSIVE CRYSTAL-RIGHT™ MEDIA

LOW MAINTENANCE BRINE TANK

QUARTZ UNDERBEDDING

Evolve conditioners combine the unique Crystal-Right media with a self-monitoring, deep cleaning system. This innovative product treats elevated levels of iron, manganese, mildly acidic water conditions, all while softening hard water.

EVOLVE® SOFTENERS:

PATENTED CHLORINE GENERATOR OR SALT MONITOR AVAILABLE

PATENTED IQ² TECHNOLOGY

HIGH PERFORMANCE RESIN MEDIA

LOW MAINTENANCE BRINE TANK

QUARTZ UNDERBEDDING

Featuring Evolve's advanced, patented IQ² controller technology, your softening system can be fine-tuned to your specific water treatment needs. They are designed to deliver and maintain the brilliant water your household deserves. Take a look at the variety of models and features we have to choose from:

	EVR	EVRS	ES
IQ ² Technology	✓	✓	✓
Quality Tested Resin	✓	✓	✓
Dry Salt Storage	✓	✓	✓
W.E.T. Compatible	✓	✓	
R/C Available	✓	✓	
Twin Unit Available	✓	✓	
Chlorine Generator	✓		
Salt Monitor Option		✓	
wripli Compatible	✓		

Whether it's high efficiencies, the convenience of remote WiFi monitoring, or a split tank to condition city water as it softens, Evolve has a system for you.

Learn more about the advanced features available by visiting www.EvolveYourWater.com.

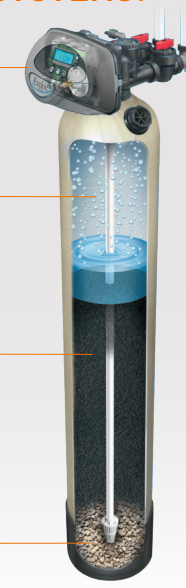

EVOLVE® FILTRATION SYSTEMS:

PATENTED IQ² TECHNOLOGY

INNOVATIVE AIR CHAMBER AVAILABLE

EFFECTIVE FILTRATION MEDIAS

QUARTZ UNDERBEDDING

AIR-CHARGED FILTERS

Evolve filtration systems combine a unique air induction system with specialized media to ensure efficient removal. The air chamber first oxidizes dissolved solids and gases changing them into particles that can easily be trapped by the media. These models are excellent at reducing stain-causing iron and manganese, or the rotten egg odors from hydrogen sulfide.

Evolve filters that utilize air technology come equipped with Inch Worm to release the air slowly.

For water that needs additional protection, an ozone generator is available to keep the system clean.

BACKWASHING FILTERS

Evolve's backwashing filtration systems provide custom solutions for uncommon water problems using any variety of filtration media to neutralize acidic water, reduce high levels of chlorine, eliminate nuisance particles and much more.

wripli Compatible with our optional Wripli® WiFi technology.

DRINKING WATER SYSTEMS:

Using a series of highly effective filters, including a reverse osmosis membrane, Evolve drinking water systems reduce unwanted contaminants from your water. These systems are designed to improve your water's taste, smell, and even its appearance.

UltoWater® systems are NSF/ANSI Standard 58 certified and make healthy water for your home more convenient. Reduce the contaminants* that concern the health of your family, including:

- Arsenic
- Fluoride
- Nitrates
- Chromium
- Copper
- Lead
- Cysts
- And more.

Clear Flo® drinking water systems filter water down to the molecular level to ensure healthier, fresher water. Only the highest quality water makes it through the filtration to your faucet.

Do not use these systems with water that is microbiologically unsafe or of unknown quality, without adequate disinfection before or after the system. Reverse osmosis technology is known to substantially reduce the total dissolved solids in a water supply from 95 to 99%. Results will vary based on feed water quality and temperature. Impurities are not necessarily in your water.

*For specific percentages of contaminant reduction, consult the performance data sheet. This system shall only be used for arsenic reduction on chlorinated water supplies containing detectable residual free chlorine at the system inlet. Systems certified for cyst reduction may be used on disinfected water that may contain filterable cysts.

CRYSTAL-RIGHT. ADVANTAGE.

Unlike normal softening resin, these silica-based crystals effectively filter problem minerals, as well as correct mildly acidic water conditions while efficiently softening your water.

Crystal-Right's durability makes it the perfect pair for our patented chlorine generator, which activates to keep your unit clean.

wripli Compatible with our optional Wripli® WiFi technology.

Twin tank systems available for the busy household
