

GIVING YOU GREAT WATER

Are you dealing with constant rust stains on your sinks, shower, and laundry? Or foul odors from your faucets? These are common complaints from homes with a private well.

Iron and sulfur are naturally occurring substances that dissolve into your water supply and travel throughout your home. These elements can effect the smell, taste, and overall performance of your water.

Reduce these issues and get the high quality water you expect with Hague's whole house filtration system. With multiple models to choose from, we can find the right solution for your home's unique water.

SYSTEM FEATURES

A SIMPLE SOLUTION THAT BRINGS RESULTS

- ① Advanced electronics track water used, flow rates, and include a built-in battery back up to protect your settings
- ② Slow release technology regulates the pressurized air that leaves the valve for quiet regenerations
- ③ Compressed air chamber oxidizes dissolved iron, manganese, and sulfur, turning them into solid particles
- ④ A variety of filtration medias available to customize the filter to your exact water needs

Made In USA

OPTIONAL OZONE GENERATOR*

Prevent bacteria inside your tank using the power of nature. Our ozone generator provides safe, automatic cleaning of your system.
